

QUALITY POLICY

ISO 9001 & as 9100 (Ref. 5.3)

It is the policy of Aerotek Aviation Engineering Ltd to provide a reliable and efficient manufacturing service to its customers, whilst conforming to the Company's objectives, statutory, regulatory and safety regulations, and to continually improve the effectiveness of the quality management system and the level of service provided.

In order to achieve this, the Company have established operational objectives which are regularly reviewed by the Accountable Manager.

Progresses towards objectives shall be communicated to all staff as part of the employee briefing and awareness sessions.

The Quality Management System which will address BS EN ISO 9001:2000 and AS 9100:2001 will ensure that all processes from enquiry to dispatch are correctly controlled and maintained. The aim is to achieve a product that meets or exceeds the customer's requirement in an efficient and economic sequence.

The Accountable Manager shall have the ultimate responsibility for all quality decisions within the Company, and shall review the Quality Policy for continuing suitability.

Everyone within Aerotek Aviation Engineering Ltd shall be responsible for the quality of work they perform. All personnel shall have access to procedures and have both the responsibility and authority to identify and evaluate solutions in relation to the job they perform.

The quality management system shall ensure that the Company can fulfil contracted obligations by:-

-Continuous monitoring and analysis of quality indicators, which provide data to enable quality improvements against customer's needs and expectations.

-Providing up to date instructions and training to all personnel together with the promotion of quality awareness.

Customer and/or regulatory authorities representatives shall have access to quality management system documentation.

The Quality Manager shall be the delegated authority for ensuring that the Quality Manual and Procedures are implemented and maintained.
